

Sub C2 > forming a bread dough by combining flour, a leavening agent [yeast], water, [fiber,] and water-soluble polydextrose anti-staling agent in an amount from about 1 percent to about [5] 10 percent by [flour] weight, based on the weight of the flour [wherein said polydextrose and fiber are present in a ratio from about 1:1 to about 5:1]; and  
baking the bread dough.

B2  
40. (Amended) The method of claim 39 wherein said polydextrose is [added] present in the bread dough in an amount of from about [2] 1 percent to about [3] 5 percent by [flour] weight, based on the weight of the flour.

41. (Amended) The method of claim 39 wherein said [baked product is a bread] polydextrose is present in the bread dough in an amount of from about 2 percent to about 4 percent by weight, based on the weight of the flour.

Sub C3 > 43. (Amended) The method of claim 39 wherein said [baked product is a sweet baked product containing sweeteners or sweetening agents] polydextrose is present in the bread dough in an amount of from about 4 percent to about 10 percent by weight, based on the weight of the flour.

B3  
44. (Amended) The method of claim [43] 39 wherein said bread dough further comprises fiber and wherein said polydextrose and fiber are present in a ratio of about 1:1 to about 5:1 [sweetening agents include intense sweeteners].

Claim 45, line 2, change "taken" to --selected--.

Claim 47, line 2, change "taken" to --selected--.

Sub C4  
B4  
48. (Amended) A baking dough used for making a baked product, the baking dough comprising:  
flour, yeast, water, and water-soluble polydextrose anti-staling agent in an amount of about 1 percent to about [5] 10 percent by [flour] weight based on the weight of the flour, [and glycerol monostearate in an amount of about 0.1 percent to about 1 percent by flour weight].

49. (Amended) The dough of claim 48 wherein said polydextrose is present in the baking dough at a level of between about [2] 4 percent and about [3] 10 percent by [flour] weight, based on the weight of the flour.

Claim 55, line 2, change "taken" to --selected--.

Sub C5  
B5  
56. (Amended) A bread dough used for making a baked bread product, the bread dough comprising:  
flour, a leavening agent [yeast], water, [fiber,] and water-soluble polydextrose anti-staling agent in an amount of from about 1 percent to about [5] 10 percent by [flour] weight, based on

sub CS → ~~the weight of the flour [wherein said polydextrose and fiber are present in a ratio from about 1:1 to about 5:1].~~

57. (Amended) The dough of claim 56 wherein said polydextrose is present in the bread dough in a level of [between] from about [2] 1 percent to about [3] 5 percent by [flour] weight, based on the weight of the flour.

BS sub F1 → 58. (Amended) The dough of claim 56 wherein said [baked product is a bread] polydextrose is present in the bread dough in an amount of from about 2 percent to about 4 percent by weight, based on the weight of the flour.

sub CB → 59. (Amended) The dough of claim 56 wherein said [baked product is a sweet baked product containing sweeteners or sweetening agents] polydextrose is present in the bread dough in an amount of from about 4 percent to about 10 percent by weight, based on the weight of the flour.

sub F1 → 60. (Amended) The dough of claim 59 wherein said [sweetening agents include intense sweeteners] bread dough further comprises fiber and wherein said polydextrose and fiber are present in a ratio of about 1:1 to about 5:1.

Claim 61, line 2, change "taken" to --selected--.
